

Annual Sustainability Report - Yıllık Sürdürülebilirlik Raporu

Current Period : August-2024 to July-2025  
Previous Year Period : August-2023 to July-2024

| Classification                                        |           | Sınıflandırma                                              | This Year Total | Last Year Total | % change from last year | Evaluation / Değerlendirme                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------------------------------------|-----------|------------------------------------------------------------|-----------------|-----------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Summary                                               | Özet      | Total energy (kWh) -                                       | 1,487,942.67    | 1,599,847.72    | -6.99                   | Kişi başı elektrik tüketimi azatılabildiği için Scope 2 Sera Gazı Emisyonu yaklaşık %10 düşürülmüştür. Ancak yakıt, su ve atık kaynaklı sera gazı emisyonu istenilen düzeyde gerçekleştirilememiştir. Ağustos 2025-Temmuz 2026 perodu için hedeflenen rakamlara ulaşılabilmesi için daha kapsamlı çalışmalar yürütülecektir. Elektrik ve sıvı yakıt tüketimi konusunda hedeflenenin çok daha üzerinde düşüş sağlanmıştır. Sadece LNG tüketimi artmıştır. Sebebi Temmuz ayında su ısıtmasında elektrik sisteminin LNG ile desteklenmek zorunda kalınmasıdır. O süreçte daha fazla LNG tüketimi olmuştur. Tesis renovasyondan geçtiği süreçte, şantiyede su tüketimi artmıştır. Bu nedenle %12'lik bir artış yaşanmıştır. Atık konusunda hedefin üzerinde düşüş sağlanmıştır. Pet şişe kullanımımız azalmış olmasına rağmen, renovasyon sürecinde kullanılmak zorunda kalınan kullanımlar plastik kullanımı artmıştır. Because per capita electricity consumption was reduced, Scope 2 Greenhouse Gas Emissions were reduced by approximately 10%. However, greenhouse gas emissions from fuel, water, and waste were not achieved at the desired levels. More comprehensive efforts will be conducted to achieve the targeted figures for the August 2025-July 2026 period. Electricity and liquid fuel consumption decreased significantly more than targeted. Only LNG consumption increased. This was due to the fact that the electrical system for water heating had to be supplemented with LNG in July, resulting in increased LNG consumption during that period. During the facility's renovation, water consumption on site increased, resulting in a 12% increase. Waste reductions exceeded the target. Although our use of plastic bottles decreased, the use of disposable materials during the renovation process increased plastic consumption. |

| Water                                                 | Su        | Fuels measured by liquid (kg CO₂e)                         | 6,522.49        | 7,673.52        | -15.00                  | However, greenhouse gas emissions from fuel, water, and waste were not achieved at the desired levels. More comprehensive efforts will be conducted to achieve the targeted figures for the August 2025-July 2026 period. Electricity and liquid fuel consumption decreased significantly more than targeted. Only LNG consumption increased. This was due to the fact that the electrical system for water heating had to be supplemented with LNG in July, resulting in increased LNG consumption during that period. During the facility's renovation, water consumption on site increased, resulting in a 12% increase. Waste reductions exceeded the target. Although our use of plastic bottles decreased, the use of disposable materials during the renovation process increased plastic consumption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Waste                                                 | Atık      | Total Water Emissions (kg CO₂e)                            | 5,546.47        | 4,940.26        | 12.27                   | During the facility's renovation, water consumption on site increased, resulting in a 12% increase. Waste reductions exceeded the target. Although our use of plastic bottles decreased, the use of disposable materials during the renovation process increased plastic consumption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
